

北京林业大学 2023—2024 学年第 1 学期学位考试试卷

试卷名称： 硕士英语一外

班级_____学号_____姓名_____成绩_____

试卷说明：

- 1. 本次考试为 闭 卷考试。本试卷共计 7 页，共 8 大部分，请勿漏答；
- 2. 考试时间为 150 分钟，请掌握好答题时间；
- 3. 答题之前，请将试卷和答题纸上的考试班级、学号、姓名填写清楚；
- 4. 本试卷所有试题答案写在 答题纸 上，否则视为无效；
- 5. 答题完毕；请将试卷和答题纸正面向外对叠交回；不得带出考场。

考试中心提示：请你遵守考场纪律，参与公平竞争！

Part I Listening (20 points, 1 point each)

Section A

Directions: In this section, you will hear nine short conversations between two speakers. At the end of each conversation a question will be asked about what was said. The conversations and the questions will be read only once. Choose the best answer from the four choices given by marking the corresponding letter with a single bar across the square brackets on your Answer Sheet.

- 1.A. He is quite tall.
B. He is not over-weight.
C. He exercises a great deal.
D. He enjoys delicacies.
- 2.A. She is a fashion model.
B. She had good grades.
C. She had wealthy parents.
D. She is doing part-time jobs.
- 3.A. Her kids.
B. Home assignment.
C. Housework.
D. Buying groceries.

- 4. A. Indifference.
B. Approval.
C. Excitement.
D. Objection.
- 5. A. She has become more economical.
B. She is not as economical as before.
C. She no longer likes bargains.
D. She now buys nothing expensive.
- 6. A. Shocked.
B. Satisfied.
C. Scared.
D. Pleased.
- 7. A. A clinician has to publish articles.
B. A clinician needn't write any papers.
C. Competence is critical to a clinician.
D. Publicity can make one better-known.
- 8. A. To buy a cat for their parents.
B. To pick him up at the airport.
C. To take good care of the cat.
D. To keep his arrival a secret.
- 9. A. Most of them are too talkative.
B. Their answers are too simple.
C. They fail to give the right answer.
D. They don't understand the questions.

Section B

Directions: In this section, you will hear two mini-talks. At the end of each talk, there will be some questions. Both the talks and the questions will be read to you only once. After each question, there will be a pause. During the pause, you must choose the best answer from the four choices given by marking the corresponding letter with a

single bar across the square brackets on your Answer Sheet.

Mini-talk One

10. A. Between 13°C and 15°C.
B. Between 16°C and 17°C.
C. Between 20°C and 18°C.
D. Between 26°C and 27°C.
11. A. Focusing on relaxing.
B. Listening to calming music.
C. Thinking of nothing.
D. Turning off screens.
12. A. Useful physical activity before bed-time.
B. How to have a good night's sleep.
C. Causes of difficulty falling asleep.
D. Adverse effects of smartphones on sleep.

Mini-talk Two

13. A. Authors are from different countries.
B. Both stories and writers are shared.
C. Articles are written by non-professionals.
D. They are published monthly.
14. A. Experts of international renown.
B. Leaders of research institutions.
C. Patients with chronic diseases.
D. Professionals of medical statistics.
15. A. Lectures that open our minds.
B. Couples who have stayed married.
C. What makes life full and connected.
D. People who narrowly escaped death.

Section C

Directions: In this section you will hear a short lecture. Listen to the recording and complete the notes about the lecture. You will hear the recording twice. After the recording you are asked to write down your answers on the Answer Sheet. You now have 25 seconds to read the notes below.

16. But many consumers and food-safety watch-dogs worry that GMOs _____ (3 words) to our health and the environment.
17. About 75 percent of consumers say they are _____ (2 words) the safety of GM foods, according to a *New York Times* survey.
18. They believed that _____ (2 words) could have unintended consequences.
19. After looking at more than 130 _____ (2 words), the European Union concluded that there is nothing especially risky about them.
20. And _____ (2 words) that GMO-free packaged foods are necessarily healthy. Organic cookies can still contain too much sugar or salt.

Part II Vocabulary (10 points, 1 point each)

Directions: Complete the following sentences by selecting the appropriate words from the given choices.

21. _____ is a scissors-like chemical tool that can precisely cut and customize stretches of genetic material, such as human DNA.
A. Gene B. Deoxyribonucleic acid C. RNA D. CRISPR-Cas9
22. Cities are integrating parks with their infrastructure plans to manage stormwater and _____ flooding.
A. assign B. mitigate C. store D. incorporate
23. Gene editing could also potentially _____ the dangers caused by allergens.
A. eliminate B. enhance C. protect D. provide
24. It's a good thing that the total of biodiversity on earth is immense because the more biodiversity, the more _____ all life on the earth is.
A. sensitive B. monitoring C. dramatic D. secure
25. Much like a surgical procedure, wetland _____ requires time for recovery.
A. restoration B. revolution C. resolution D. recreation
26. The car's design successfully _____ art and technology, making it technically advanced and physically handsome.
A. concentrates B. includes C. integrates D. stresses
27. Biodiversity consists of 3 components: ecosystem diversity, species diversity and genetic diversity, which are

- _____ with each other.
- A. intertwined B. fixed C. covered D. scattered
28. After the new material has been placed and graded, it is _____ to seed the area and plant native vegetation and trees quickly.
- A. proper B. imperative C. certain D. clean
29. City parks provide _____ to recreational opportunities, increase property values, spur local economies, combat crime, and protect cities from environmental impact.
- A. exceed B. excess C. device D. access
30. People with high blood pressure are especially _____ to diabetes.
- A. adapted B. resilient C. resistant D. vulnerable

Part III Completing the passage (10 points, 2 points each)

Directions: The following passage is selected from the Materials and Methods section of a paper entitled *Habitat age affects beetle diversity in wildflower areas*. Please fill in the blanks with the appropriate sentences listed below the passage.

The study was conducted between May and August 2001 around Bern (Swiss plateau) and Solothurn (Bucheggberg), an intensively used arable region of some 500 km² in Switzerland. _____31_____. The minimum distance between two study sites was 500 m, and the sites belonged to 5 habitat types (1-4-year old wildflower areas, winter wheat fields) with four replicates each. Winter wheat (ww) is the most widespread crop in Switzerland and served as a control. _____32_____. Wildflower areas (wa), which had a minimum width of 3 m, were adjacent to crop fields and established where cereals were grown previously. They were sown with a recommended mixture containing 25 native non-grassy arable plants, meadow and ruderal plants including five annuals, but not fertilized or treated with pesticides. _____33_____. In the 16 wa all 25 sown plant species were observed. The four 1 y old wa were sown in the first week of May 2001. Two to four year old wa were sown in April 2000, 1999 and 1998, respectively. The wa of different age and the ww fields were intermingled within the research area to avoid spatial autocorrelation. The five habitat types had an average area of 0.8 ha and did not differ significantly in size (ANOVA: F_{4,15}=2.73, P=0.069, n=20).

_____34_____. Sampling was restricted to periods when conditions were favorable for beetle activity, i.e. between 10:00 a.m. and 17:30 p.m., when the minimum air temperature was 15°C, it was sunny and not windy, and the vegetation was dry. The beetles were collected using a sweep-net (Otto, 1996) of 40 cm diameter fitted with a heavy cloth suitable for use in coarse vegetation. Each sample consisted of 100 sweeps made

through the vegetation at a constant pace along a transect of 80 m in length situated parallel to the field edge. To determine the impact of environmental variables on the beetle assemblage, flower abundance, vegetation structure, plant species richness, plant biomass, field size and landscape composition were analyzed. _____35_____. The Tukey test was carried out for multiple comparisons.

- A. Winter wheat fields were sown in October 2000 and managed according to the guidelines for integrated production
- B. The study sites were in the same climatic zone, providing similar site conditions in terms of altitude, mean annual rainfall and temperature
- C. One-way ANOVA was performed using the program SPSS 11.0 to test for differences in beetle abundance, species richness, diversity (Simpson index) and evenness (Pielou), as well as differences in environmental variables among the different habitat types
- D. Sampling was carried out four times between the beginning of May and mid-August 2001
- E. From the second year on, one half of each wildflower area was mown in rotation yearly after the flowering period

Part IV Cloze (10 points, 1 point each)

Directions: There are 10 questions in this part of the test. Read the passage through. Then, go back and choose one suitable word or phrase marked A, B, C, or D for each blank in the passage. Mark the corresponding letter of the word or phrase you have chosen with a single bar across the square brackets on your Answer Sheet.

Our school provides a strong academic curriculum as well as extensive programs in fine arts and physical education. Our school is a ____36____ of students who are eager to learn ____37____ learning, willing to take risks in order to grow, and ____38____ to show compassion for others. The diverse students learn to apply values and principles to life beyond the classroom.

Our curriculum ____39____ ongoing conversations between the faculty and administration, so it reflects our respect for our rich academic heritage, and our ____40____ with current educational practices and philosophical thought. Many conversations we will have during the admissions process will bring you ____41____ what is truly special and unique about our school.

We believe that children can best acquire a rich ____42____ of knowledge and the skills needed for future learning through a curriculum that is ____43____ appropriate and that builds upon itself year by year. It is our hope that our curriculum is an expression of the school's mission, which is to ____44____ a love of learning, to build self-confidence, and to ____45____ in our students the ability and desire to contribute to their community.

36. A.commitment

B. counterpart

C. containment

D. community
37. A. in the wake of

B. for the sake of

C. at the cost of

D. on the part of
38. A. quick

B. probable

C. easy

D. necessary
39. A. diverts from

B. refrains from

C. stems from

D. ranges from
40. A. access

B. involvement

C. ignorance

D. reliance
41. A. closer to

B. farther from

C. better at

D. sadder about
42. A. vision

B. number

C. group

D. body
43. A. partially

B. presumably

C. developmentally

D. notoriously
44. A. perspire

B. aspire

C. expire

D. inspire
45. A. engage

B. foster

C. turn

D. participate

Part V Reading Comprehension (15 points, 1 point each)

Directions: In this part of the test, there are four short passages. Read each passage carefully, and then do the questions that follow. Choose the best answer from the four choices given and answer the questions on your Answer Sheet.

Passage 1

Last August,Finland's comprehensive family leave plan went into effect, granting 160 days of parental leave to both parents. Despite progress in other countries, we question whether the US will ever understand how critical paid family leave is to true gender equality.

The World Economic Forum released a new report that estimates women won't attain equality with men until the year 2154. A woman is considered fortunate if her husband is an involved father. As women continue to shoulder the burden of caregiving, a lack of paid family leave adds to the inequalities they face in the workplace.

The system is not just broken — it was never built to make us equal. But no step is too small when it comes to shaping our own futures. We have to do something rather than sit back and watch continued inequality.

Let's start with finances. The odds continue to be stacked against women in this aspect. They have less savings for retirement, and they don't work with investment advisers as much as men do, making it harder for them to build wealth.

It's not just a wealth gap, but a wealth knowledge gap. Women often demonstrate a lack of confidence when it comes to their financial wellness, which contributes to lower levels of financial literacy. A foundation of knowledge can offer women an opportunity to take control of their finances and feel empowered when building

wealth.

Business leaders need to provide women with resources that not only support their long- term goals, but also offer financial education programs that can help them make smart saving, investing and retirement decisions. That might include workshops around setting financial goals or services that make it easier to track spending and saving habits.

Secondly, the US is one of the handful of industrialized nations without a national paid family leave policy. Even in the private sector, only about a quarter of workers can enjoy paid leave. 74% of women who take unpaid maternity leave will have drained their savings after eight weeks.

While we know a national policy for paid family leave is fundamental to making it accessible for all, we cannot wait around until that happens. In March, we launched a database where companies can showcase their leave policies, because we knew it was imperative for business leaders to speak up. Without paid family leave, women will continue to be pushed out of the workforce. The fact that enough progress won't be made for another century can feel crippling. 100 more years are too long.

46. In Paragraph Two, “an involved father” is probably a father who _____.

A. is found associated with a scandal

B. has an affair with another woman

C. is the sole decision-maker at home

D. spends a lot of time with his kids
47. Paragraph Three is intended to be _____.

A. a sigh of relief

B. an indication of despair

C. an effort to abolish the system

D. a call for action
48. The underlined sentence in Paragraph Four means that women _____.

A. tend to make strange decisions

B. are in an unfavorable situation

C. can never accomplish any feat

D. have many good opportunities
49. Paragraphs Five and Six recommend that women _____.

A. be provided with financial education

B. learn about finances from co-workers

C. be put in more important positions

D. offer more services to make money
50. The central idea of this passage seems to be that _____.

- A. gender discrimination exists in the United States
- B. the social status of women has been improving
- C. there are ways that contribute to gender equality
- D. women are organizing to fight for gender equality

Passage Two

Do you want to be a lifeguard? In Philadelphia a candidate must swim 300 yards without stopping, complete 12 laps in a 25-yard pool and tread water for two minutes without using arms. They must also retrieve a ten-pound brick from a well 12 feet deep, return to the surface and, using legs only, swim 20 yards back to the starting point with the brick, and hold it out of the water with both hands within 100 seconds. After that comes a 25-hour training course, including first aid.

It may look like an easy job, sitting on a chair by the water, but it is highly skilled. This is part of the reason that pools and resorts are struggling to find lifeguards. The main cause is the pandemic. When pools closed, the pool of lifeguards dried up. A poll in May found that only 12% of the park and recreation leaders were fully staffed for the summer. Many pools are closed or operate for reduced hours. Some beaches may be unmanned.

Austin has 462 lifeguards, 62% of the 750 needed to operate its summer pools. It has opened only 15 of its 32 pools. In New Orleans some pools will open for two days a week instead of the usual five or six. New York City has had to cancel its aquatic programs, including free swimming lessons. Philadelphia has 1.6m people and 1m pool visits every summer. It is opening 50 of its 63 pools on a rolling basis. Philadelphia is using TikTok to recruit lifeguards, as well as looking to pensioners: one, a 70-year-old grandmother, last served as a lifeguard when she was 16. Austin is offering signing bonuses of up to \$750; New Orleans has raised its summer hourly wage from \$12.57 to \$18.02.

Private resorts are struggling, too. George Amitrano, general manager of a beach club on Long Island, is worried he will lose lifeguards to the club next door, which is offering \$3 more an hour. “The candidates are just not out there,” says Bud Johnson, chief of patrol in Wildwood Crest. Usually he has his pick. “This year we worked with whoever showed up to take the test until we could get them up to standard.” The pipeline has already been screwed up in the last two years and it's not going to get better.

Water programs may seem like a luxury, but they are a matter of life and death. Pools and beaches keep people cool, teach children to swim and keep them out of trouble in summer when violence often increases in cities. Three people, sadly, drowned at Wildwood's beaches in June. No one has perished when a lifeguard has been on duty.

51. The central idea of the first paragraph is that _____.
A. working as a lifeguard is much fun
B. a lifeguard has to persist in daily training
C. becoming a lifeguard is far from easy
D. a lifeguard performs different tasks daily
52. It can be inferred from Paragraph Three that summer pools _____.
A. are no longer as popular as before
B. are mostly unmanned to save costs
C. suffer from shortages of lifeguards
D. have become unbearably expensive
53. Paragraph Four focuses on _____.
A. the financial trouble facing private resorts
B. the unusually high pay to lifeguards
C. the difficulty training new lifeguards
D. the shortages of candidate lifeguards
54. The last two sentences of this passage imply that lifeguards are _____.
A. sometimes useless
B. really indispensable
C. quite safe at work
D. rarely out of work
55. Which of the following can best serve as the title of this passage?
A. Where Have All the Lifeguards Gone?
B. How to Run Summer Pools and Resorts
C. How Do Lifeguards Play Their Roles?
D. Ways to Help Keep Lifeguards at Work

Passage Three

The market for packaged foods is a competitive one, where price rises by one firm risk pushing shoppers into the arms of rivals. Companies in the industry deal with soaring costs by protecting against spikes of prices in commodity markets using forward contracts, reformulating products so they contain less of the pricier foodstuffs or, failing that, making packages a bit smaller unnoticed while keeping the ticket price the same.

Amid pandemic-related supply chain bottlenecks, labor shortages and crop failures, food firms have repeatedly done all that. Even so, they have had to raise prices, often less prudently than is ideal. The war between Ukraine, known as Europe's breadbasket thanks to its rich soil, and Russia, the world's top

exporter of wheat, is forcing their hand once again. Together the two countries account for 29% of international wheat sales and nearly 80% of sales of sunflower oil. Disruptions to those critical supplies are pushing up food companies' costs just as energy costs are also sky high as a result of the war.

It will be harder for European food companies to pass price rises to consumers than for American firms. Supermarkets in Europe are more concentrated than in America, and drive a harder bargain with suppliers. Walmart, America's biggest, controls 17% of the domestic market. Its British and German counterparts, Tesco and Edeka, respectively, have nearly 30% of theirs. Moreover, cost-conscious Europeans shop more at discounters such as Aldi or Lidl. They are also less fussy than Americans about branded products and buy more of the retailers' own labels.

On March 23rd General Mills, the American maker of Cheerios and Wheaties, among other sugary fare, reported healthy margins and quarterly sales that were higher than in the same period in 2019, before the pandemic (though flat compared with last year). The firm insisted that demand for packaged food should remain strong all year as many people continue to work from home at least some of the time. Robust appetite for its products will, the firm says, allow it to raise prices to offset the rising costs of commodities. That may be optimistic. Shoppers' patience with inflation is wearing thin on both sides of the Atlantic. Investors expect margins to narrow. The share prices of big American, European and Chinese food firms alike experience a severe misfortune after the war broke out across Ukraine in February.

56. According to Paragraph One, producers of packaged foods _____.

- A. cope with surging costs by various means
- B. have to create a larger variety of foods
- C. attract shoppers by making foods cheaper
- D. never change the net weight of any food

57. Paragraph Two centers on _____.

- A. causes of the war in Ukraine
- B. how food prices vary globally
- C. impacts of the Covid-19 pandemic
- D. the causes of higher food prices

58. Europeans are less subject to price rises due to the following **except** _____.

- A. lower prices by the suppliers
- B. less interest in branded products
- C. more adequate supply of foods
- D. preference for discounters

59. It can be learned from the last paragraph that the author _____.

- A. disagrees with General Mills
- B. totally agrees with General Mills
- C. believes in the stability of food prices
- D. considers price rises of foods necessary

60. The central idea of this passage is that _____.

- A. food prices change with the demand
- B. there are ways to keep food prices stable
- C. food firms benefit from high food prices
- D. packaged foods are set to be more expensive

Part VI Multiple choice (15 points, 1.5 points each)

Directions: Choose one suitable answer marked A, B, C, or D for each blank.

61. Which statement is true about Discussion section?

- A. Discussion is an essential part for every academic paper.
- B. Sometimes Discussion is merged into Results.
- C. Discussion can add some new findings.
- D. Research limitations tend to appear in Results rather than Discussion.

62. _____ this momentum, major data and methods gaps exist for how to measure, monitor and assess ES in heterogeneous forests.

- A. Despite
- B. Although
- C. In spite
- D. While

63. What is generally NOT written in the section of Materials and Methods?

- A study site
- B procedures
- C research gap
- D data analysis

64. In recent years, the rising frequency of food safety scandals has provoked consumers' vigilance on food safety _____ it is unrelated to GM technology.

- A. despite
- B. however
- C. while
- D. though

65. What is the function of the sentence below?

These limitations are primarily related to the measures that were administered as part of the GSOEP project.

- A. Summarizing key results.
- B. Commenting on the key results.
- C. Stating the drawbacks of the study.
- D. Making recommendations for future research.

66. This finding _____ consistent with the existing literature that backpacking is a life-changing experience.

- A. was B. will be C. has been D. is

67. Please choose the weakest claim from the following sentences.

The survey _____ that children with high IQ tend to perform better in school.

- A. implies B. indicates C. could prove D. should show

68. What function does the following sentence NOT perform?

A number of quantitative trait loci (QTL) affecting grain number per spike have been mapped in wheat; however, the gene(s) underlying these loci have yet to be identified (Ellis, 2014; Langner, 2018; Zaidi et al., 2018).

- A. Showing the contributions of the previous researchers.
B. Revealing the methods of the present study.
C. Implying the subsequent research direction.
D. Indicating a research niche.

69. This change caused the crystal field around the Co²⁺ ions to change, _____ resulting in the loss of the characteristic blue color.

- A. hence B. despite C. thus D. since

70. The IPA1-Pro10 fragment may contain other regulatory elements in regulating tiller number. Moreover, IPA1-Pro13 plants showed no significant differences in any of these traits compared to ZH11. Taken together, all these _____ demonstrated that the An-1 binding site-containing fragment was responsible for regulating multiple traits in panicle, stem and root.

- A. results B. differences C. fragments D. methods

Part VII Translation (10 points, 2 points each)

Directions: Put the following five sentences into Chinese. Write your Chinese version in the proper space on the Answer Sheet.

71. Wetlands slowly release water after filling up, continuing to provide water to surrounding areas in dry conditions.
72. The entire fabric of the reef will be under threat if destructive fishing practices, pollution and ocean acidification weaken or kill the coral.
73. Building an indoor vertical farm needs to replace some of the conventional elements of farming with artificial substitutes, starting with sunlight.
74. Urban parks are often venues for cultural or recreational events, and in many cases, they house buildings and facilities of great historical and cultural value.
75. In addition to treating diseases, CRISPR technology can be used for enhanced properties, such as stronger bones, different eye color or height.

Part VIII Writing (10 points)

Directions: Please write a composition based on the following topic with no less than 150 words. Express your opinion with clear, logical and coherent statements.

My Understanding of Green City
