

北京林业大学 2024—2025 学年第 1 学期学位考试试卷

试卷名称: 硕士英语一外

班级_____学号_____姓名_____成绩_____

试卷说明:

- 1. 本次考试为 闭 卷考试。本试卷共计 8 页, 共 8 大部分, 请勿漏答;
- 2. 考试时间为 150 分钟, 请掌握好答题时间;
- 3. 答题之前, 请将试卷和答题纸上的考试班级、学号、姓名填写清楚;
- 4. 本试卷所有试题答案写在 答题纸 上, 否则视为无效;
- 5. 答题完毕; 请将试卷和答题纸正面向外对叠交回; 不得带出考场。

考试中心提示: 请你遵守考场纪律, 参与公平竞争!

Part I Listening (20 points, 1 point each)

Section A

Directions: In this section, you will hear nine short conversations between two speakers. At the end of each conversation a question will be asked about what was said. The conversations and the questions will be read only once. Choose the best answer from the four choices given by marking the corresponding letter with a single bar across the square brackets on your Answer Sheet.

- 1. A. To enjoy more sunshine. B. To leave the woods quickly.
C. To be out of danger sooner. D. To stay in another ward.
- 2. A. He is academically excellent. B. He cares little about the score.
C. He is asking for a higher score. D. He is likely to fail this course.
- 3. A. She is making fun of this man.
B. She is giving this man some tips.
C. She is asking the man a question.
D. She is trying to flatter the man.

- 4. A. He finished the jigsaw puzzle quickly.
B. He misinterpreted “two to four years.”
C. He was going to make a big deal.
D. He wanted to buy all the drinks in the bar.
- 5. A. He strongly dislikes John.
B. He’ll keep their romance a secret.
C. He doesn't seem to love this girl.
D. He has not made up his mind yet.
- 6. A. We can never make enough money.
B. This course seems too expensive.
C. She doesn’t care about the expense.
D. There is no one who dislikes money.
- 7. A. Because his close friends died.
B. Because he has to attend funerals.
C. Because his job is to dig graves.
D. Because he enjoys volunteer work.
- 8. A. Over 80,000 yuan.
B. About 108,000 yuan.
C. Nearly 50,000 yuan.
D. Around 72,000 yuan.
- 9. A. She is checking in at an airport.
B. She is booking a train ticket.
C. She is picking a seat in the cinema.
D. She is upgrading her car facilities.

Section B

Directions: In this section, you will hear two mini-talks. At the end of each talk, there will be some questions. Both the talks and the questions will be read to you only once. After each

question, there will be a pause. During the pause, you must choose the best answer from the four choices given by marking the corresponding letter with a single bar across the square brackets on your Answer Sheet.

Mini-talk One

10. A. 81%. B. 17%. C. 8%. D. 3.1%.
11. A. Because they are sold at a lower price.
B. Because they are kept in warehouses.
C. Because they have to be sent back.
D. Because they are disposed in landfills.
12. A. Free returns are going away.
B. Goods become more expensive.
C. Retail increases during the holidays.
D. Online shopping brings about risks.

Mini-talk Two

13. A. They travel in hot weather.
B. They are violently angry.
C. They feel quite excited.
D. They have eaten peppers.
14. A. In a blue mood.
B. Feeling a little green.
C. Looking very green.
D. In the pink.
15. A. Darkness of the night.
B. Cutoff of electric power.
C. Shortages of electric power.
D. Air-raids by enemy planes.

Section C

Directions: In this section you will hear a short lecture. Listen to the recording and complete the notes about the lecture. You will hear the recording twice. After the recording you are asked to write down your answers on the Answer Sheet. You now have 25 seconds to read the notes below.

16. While the study cannot _____ (2 words) that ultraprocessed foods are the direct cause of multiple diseases....
17. Based on other _____ (2 words), it is very likely that some types of UPF can increase the risk of later disease....
18. Ultraprocessed foods contain ingredients that...whose function is to make the final product more _____ (3 words).
19. When ultraprocessed foods were examined by subgroups, not all appeared to be associated with developing multiple _____ (2 words).
20. This study emphasizes that it is not necessary to completely _____ (3 words) ultra-processed foods; rather,

Part II Vocabulary (10 points, 1 point each)

Directions: Complete the following sentences by selecting the appropriate words from the given choices.

21. _____ are known as the “kidneys” of the Earth.
A. Grasslands B. Wetlands C. Forests D. Lakes
22. Green spaces also filter rain, reducing water pollution, protecting drinking water, and decreasing the rates of _____ illness.
A. waterborne B. airborne C. soilborne D. foodborne
23. Rabbits are known for their diet, which consists mainly of grasses and leaves, classifying them as _____.
A. herbicides B. vegetarians C. herbivores D. carnivores

24. Which of the following words means to make something less severe or harmful?
A. Increase B. Aggravate C. Mitigate D. Multiply
25. The government’s new infrastructure plan is expected to _____ economic growth in the region.
A. deplete B. hinder C. complicate D. spur
26. The new policy aims to be more _____, ensuring that all students, regardless of their background, feel welcome and valued in the school community.
A. expensive B. exclusive C. conclusive D. inclusive
27. Which of the following words is related to the release of gases or particles into the atmosphere?
A. Absorption B. Reflection C. Emission D. Condensation
28. The environmentalists warned that the delicate balance of the ecosystem could begin to _____ if the deforestation continued uncontrolled.
A. unravel B. flourish C. stabilize D. transform
29. Scientists are exploring the potential of gene editing technologies to develop new forms of _____ for genetic disorders.
A. diagnosis B. therapy C. barrier D. medication
30. Which term refers to a change in the genetic sequence of DNA?
A. Infection B. Molecule C. Discovery D. Mutation

Part III Put the selected sentences in the correct order (10 points, 2 points each)

***Directions:** The following passage is adapted from the Introduction section of a paper entitled A Critical Analysis of Representations of Inequalities in Childhood Obesity in Australian Health Policy Documents. Please fill in the blanks with the appropriate sentences listed below the passage.*

_____31_____, with these consequences often extending into adolescence and adulthood. In high-income countries like Australia, childhood obesity is linked to

socioeconomic status, with children from disadvantaged backgrounds more likely to be affected. _____32_____.

The determinants of childhood obesity are complex, spanning individual behaviors such as diet and physical activity, as well as social determinants of health (SDoH). SDoH encompass the conditions in which we live our daily lives, including early life experiences, education, employment, housing, and food environments. _____33_____. Health equity is about ensuring everyone has a fair chance to achieve their full health potential.

To combat childhood obesity, comprehensive government policies are necessary to create equitable food and physical activity environments. Effective policies must address structural barriers to health, aiming to change the circumstances that influence individual decisions to support healthy choices. These interventions are typically regulatory and do not rely on individual agency.

Equity-oriented health policy focuses on ensuring that less privileged groups have the same opportunities to attain health as those who are better off. _____34_____.

Government policies on obesity prevention are shaped by policymakers' ideologies and values and are influenced by political, institutional, and interest groups. They carry implicit or explicit problem representations that influence media and public discourse, shaping the political agenda. The way issues are represented within policy documents can direct attention to or shift focus from particular aspects of a problem, influencing the actions taken to address it.

_____35_____. It aims to provide insights into the government's institutional commitment to addressing these inequalities and to inform future policy, research, and advocacy efforts.

A. Well-designed policies that address obesity drivers and create health-promoting environments, along with targeted actions, can lead to fairer health opportunities

- B. This socioeconomic patterning is not only present but also widening in Australia, indicating a growing inequality

C. This study examines health policy documents to understand how inequalities in childhood obesity are represented as a problem in Australia

D. Children with obesity are at a higher risk of physical and psychological health issues

E. These determinants are not equally distributed, leading to unjust health inequalities

Part IV Cloze (10 points, 1 point each)

Directions: There are 10 questions in this part of the test. Read the passage through. Then, go back and choose one suitable word or phrase marked A, B, C, or D for each blank in the passage. Mark the corresponding letter of the word or phrase you have chosen with a single bar across the square brackets on your Answer Sheet.

Today, 75% of the world’s food comes from just a dozen crops and five animal species, leaving supplies very ____36____ to pests or disease that can ____37____ large areas of monocultures. The problem ____38____ humanity is the falling yields expected from climate change and the growing population. The answer is to conserve the wild relatives of crops, which ____39____ have evolved solutions to environmental challenges. There are tens of thousands of wild or rarely cultivated species that not only can provide a richly varied range of nutritious foods, but also are resistant to disease and ____40____ of the changing environment.

However, ____41____ some examples of harnessing nature’s genetic abundance, a fifth of wild potatoes are likely to go extinct by 2050. Almost 70% of chocolate’s key ____42____ is grown from a single species in Ghana and Ivory Coast, so the cacao trees may be unable to ____43____ potential temperature rises. In coffee’s birthplace in Ethiopia, wild relatives are being lost as half the current growing areas are ____44____ warming. Therefore, there is a desperate need to consider what we humans can do ____45____ such a threat.

- | | | | |
|-----------------|------------------|--------------|----------------|
| 36. A. immune | B. inadequate | C. confined | D. vulnerable |
| 37. A. speed up | B. sweep through | C. run into | D. come across |
| 38. A. facing | B. faces | C. face | D. faced |
| 39. A. at first | B. in advance | C. over time | D. before long |

| 44. A. due to | B. subject to | C. up to | D. known to |
| 45. A. towards | B. for | C. opposite | D. about |

Part V Reading Comprehension (15 points, 1 point each)

Directions: In this part of the test, there are three short passages. Read each passage carefully, and then do the questions that follow. Choose the best answer from the four choices given and answer the questions on your Answer Sheet.

Passage 1

(1) Is an interesting job better than a well-paid one? On the face of things, doing something that stimulates and interests you should be far more positive than going for the big bucks. While this is mostly true, there are downsides to cool jobs.

(2) For starters, people often go into sectors because they’re widely viewed as being interesting and not because they personally find the job in question interesting. Thus, you might get a job in the media, when actually you’d be much happier working in IT because what really motivates you is solving problems. Therefore, you need to think hard and honestly about what interests you.

(3) Bear in mind too that, when it comes to interest, all jobs to some extent revert to the norm. What you loved when you joined can easily become just work three years down the line, especially if you are the kind of person who sees work as a means to an end. Moreover, as you

rise through the ranks, you often move away from what makes your job interesting and into general management, which is pretty similar whatever sector you're in.

(4) You often see this with people who work in tech: they don't want to be promoted because they want to do the interesting stuff, not manage people. "Be very careful about letting go of what interests you for more money," says Gooden. While there is a common belief that we should all aim as high as possible at work, not many people are motivated by really demanding jobs.

(5) So, is it more important to earn a lot of money or have an interesting job? The answer is that you need to step back and ask yourself what is important to you-while reminding yourself that your work does not exist in isolation. However, we can say that earning vastly in excess of what you need will not necessarily make you happy - and if you have the choice between a job that interests you and pays enough and one that doesn't interest you and pays far more, you should go for the former.

(6) Finally, it's worth remembering that one of the most significant contributors towards happiness at work is not related to how interesting your job is or how much it pays. "Relationships at work are so important," says Prof Cooper, "especially your relationship with your line manager." In fact, if you hate your boss, you'll probably still be miserable, even if your job is both fascinating and well-paid.

46. The underlined words in Paragraph One probably mean "_____".

- A. an enjoyable job
- B. a large sum of money
- C. multinational corporations
- D. a big and comfortable house

47. According to Paragraph Two, people are likely to _____.

- A. start with a job that really interests them
- B. choose a job regardless of others' opinions
- C. think hard and honestly while job hunting
- D. get a job that turns out to be disappointing

48. The underlined sentence in Paragraph Four advises people to _____.

- A. make more money out of interest
- B. try not to give up interest easily
- C. earn more by sacrificing interest
- D. not to confuse interest with money

49. According to this passage, happiness at work depends primarily on _____.

- A. whether the job interests you
- B. how much you are paid
- C. relationships at work
- D. all the above

50. The central idea of this passage is that _____.

- A. interest outweighs how much you make
- B. an interesting job is nowhere to be found
- C. incomes are more important than interest
- D. no job is both fascinating and well-paid

Passage Two

(1) A study published in June found that describing a product as using AI turns off customers. Researchers sampled participants across age groups and showed them the same products - the only difference between them: one was described as "high tech" and the other as using AI. In each case, the intention to buy or use the product was significantly lower whenever AI was mentioned in the product description, highlighting consumers' hesitance to incorporate AI into their daily lives.

(2) Included in the study was an examination of how participants viewed products considered "low risk," which included household appliances that use AI, and "high risk," which included self-driving cars, AI-powered investment services and medical diagnosis services. While the percentage of people rejecting the items was greater in the high-risk group, non-buyers were the majority in both product groups.

(3) There are two kinds of trust that the study says play a part in consumers' less-than-rosy perception of products that describe themselves as "AI-powered."

(4) The first kind, cognitive trust, has to do with the higher standard that people hold AI to as

a machine they expect to be free from human error. So, when AI slips up, that trust can be quickly eroded. Take Google's AI-generated search results overview tool, which summarizes and presents search results for users. People were quick to criticize the company earlier this year for providing confusing and even false information to users' questions, pressuring Google to walk back some of the features' capabilities.

(5) The limited knowledge and understanding about the inner workings of AI forces consumers to fall back on emotional trust and make their own subjective judgments about the technology.

(6) And the way AI is portrayed in pop culture isn't helping boost trust in the technology either. Hollywood science fiction films casting robots as villains had a bigger impact on shaping public perception towards AI than one might think.

(7) Another part of the equation influencing customers is the perceived risk around AI - particularly with how it handles users' personal data. Concerns about how companies manage customers' data have lessened excitement around tools meant to streamline the user experience. They don't know what's going on in the background.

(8) This lack of transparency is something that has the potential to sour customers' perceptions towards brands they may have already come to trust. It is for this reason that companies are cautioned against slapping on the "AI" tag as a buzzword without elaborating on its capabilities. The right messaging matters. Rather than simply putting 'AI-powered', telling people how this can help them will ease the consumer's fears.

51. The finding of the study mentioned in this passage is that consumers _____.

- A. preferred AI to high technology in their daily lives
- B. might be driven away by the "AI" label on products
- C. never purchased any product labeled with AI
- D. were quick to accept each product containing AI

52. The underlined words in Paragraph Four probably mean "_____".

- A. makes improvements
- B. runs away unnoticed
- C. makes a mistake
- D. has been upgraded

53. Google is mentioned in Paragraph Four to show that _____.

- A. Google can never be trusted
- B. AI is usually error-free
- C. AI is prone to errors
- D. the Internet is full of misinformation

54. Customers may lose their trust in a brand because of the following **except** _____.

- A. poor quality of products
- B. a lack of transparency
- C. Hollywood movies
- D. worries about privacy

55. This passage aims to deliver the message that _____.

- A. AI mentioned in product descriptions boosts sales
- B. AI has been used in descriptions of most products
- C. brands should avoid using a popular term—AI
- D. AI is posing a big threat and risk to human lives

Passage Three

(1) From the security-camera footage last July, it looks terrifying. Masked men burst into liquor store in Bucktown in Chicago, pointing guns. Customers stick their hands up, as one gunman waves his weapon furiously. Suddenly, the employee behind the counter disappears, as fragments of glass or liquid fill the screen. He has been shot in the stomach. The robbers flee in a stolen Kia car. "They said, give us all of the money," said the business's owner in an interview to local TV news.

(2) So far, so normal. Liquor-store robberies are hardly rare in America. Yet, according to an accusation unsealed in federal court in Chicago on May 17th, 2024, this one was staged: some of the victims had paid to get robbed. This was among the 16 ones allegedly organized by the defendants, mostly in Chicago. According to the accusation, they were conducted "so that the intended victims of the robberies could apply for U-visas". Six people, four of them Indian nationals, have been charged with conspiracy (共谋) to commit visa fraud.

(3) The U-visa was created in 2000 by Congress as part of a broader act against human trafficking. It is available to victims of certain serious crimes, and gives the recipients and their immediate family the right to live in America for four years, with a path to a green card. The idea is to ensure that victims without legal status in America cooperate with the authorities.

(4) Police in Houston say that a robbery-murder in January may have been part of a stupid attempt to manage to get a U-visa. Late last year two suspects were charged in federal court in Massachusetts with conducting a string of fake robberies in four states. In 2022 government auditors reported that safeguards against fraud with the U-visa were weak.

(5) Yet do legitimate victims have an easy time getting a U-visa? To apply, you need a police officer to certify you were a victim of a crime. In 2022 the Chicago Police Department was criticized for refusing about half of the applicants. And being certified is only the start. Congress sets a cap of 10,000 visas per year; the accumulation of undecided applications has reached 354,000. Joining the queue gives applicants the right to work. But it is an almost five-year wait just to do that.

(6) Arranging a fake robbery for a semi-legal status in half a decade seems quite a risk to take. But many would-be immigrants are desperate. Some 10m people in America have no path to legal status, so people will take the few avenues they have.

56. The first paragraph is concerned with _____.

- A. why this store robbery seemed odd
- B. a scene from a movie about robbery
- C. what was recorded by the security-camera
- D. how the store owner described the robbery

57. The so-called victims paid to get robbed in order to _____.

- A. claim compensations
- B. apply for U-visas
- C. attract more attention
- D. accuse the robber

58. According to Paragraph Five, a U-visa is _____.

- A. not easily available to legitimate victims
- B. given to each applicant after five years
- C. granted to over 10,000 applicants annually
- D. actually given to very few applicants

59. This passage focuses on _____.

- A. why a few would-be immigrants pay to get robbed
- B. how to compensate for victims of store robberies
- C. the different causes of robberies in liquor stores
- D. the loopholes of the act against human trafficking

60. Which of the following can best serve as the title of this passage?

- A. Why Legal Status Matters
- B. Uncle Sam
- C. Robbery vs Bravery
- D. U Bet

Part VI Multiple choice (15 points, 1.5 points each)

Directions: Choose one suitable answer marked A, B, C, or D for each blank.

61. Cultural assimilation, _____ the melting-pot theory, has been a strong theme throughout the history of the United States.

- A. and
- B. such as
- C. hence
- D. or

62. Which of the following is generally NOT included in the Results section?

- A. Key findings presented in tables or figures.
- B. Indicative statements directing the readers to a table or figure.
- C. Detailed explanation of the significance of findings.
- D. Descriptive data summaries.

63. What is the function of a citation in academic writing?

- A. To give credit to the original source of information.
- B. To summarize the research findings.
- C. To introduce a new topic.

D. To provide a detailed explanation of a concept.

64. Read the following opening sentence and decide which type it belongs to:

The origin of cultivated tree peonies, known as the “king of flowers” in China for more than 1,000 years, has attracted considerable interest, but remained unsolved.

A. Starting with introducing background information.

B. Starting with a problem or an uncertainty.

C. Starting with purpose or objective.

D. Starting with present research action.

65. Bully is a pattern of anti-social _____ found in many schools.

A. behavior B. organ C. instruction D. process

66. What is the primary reason for using tentative language in academic writing?

A. To exaggerate the research findings.

B. To avoid making definitive claims.

C. To confuse the reader with complex language.

D. To increase the word count of the paper.

67. What is the function of the following sentence?

This study shows that consumers in urban China have significantly changed their perceptions on GM food safety.

A. Providing background information. B. Commenting on the key results.

C. Stating the limitations of the study. D. Reporting key results.

68. Which of the following is an example of a weaker claim in academic writing?

A. This study conclusively proves that...

B. It is possible that...

C. The results clearly show that...

D. There is no doubt that...

69. What should be included in the conclusion of a research paper?

A. New research questions.

B. Detailed statistical analysis.

C. A restatement of the research problem and a summary of the findings.

D. A review of the literature.

70. The experiment was conducted under controlled conditions, _____ ensuring the reliability of the data collected.

A. hence B. for C. thereby D. since

Part VII Translation (10 points, 2 points each)

Directions: Put the following five sentences into Chinese. Write your Chinese version in the proper space on the Answer Sheet.

71. These farms use a sophisticated monitoring and automation system to significantly increase productivity, efficiency and consistency.

72. Wetland restoration is the manipulation of a former or degraded wetland's physical, chemical, or biological characteristics to return its natural functions.

73. Genetic diversity can reinforce the biodiversity's weave because it helps individual species to adapt to fluctuations caused by climate change, disease or habitat destruction.

74. The rapid development and widespread adoption of easy-to-use, inexpensive and effective genome-editing methodologies have changed the landscape of biology.

75. By 2050, more than 70% of the world's population will live in cities, but how can the world cope under the strain of 3 billion more city dwellers?

Part VIII Writing (10 points)

Directions: In 2018, a researcher was punished for a study that conferred HIV resistance through genome editing at embryo stage. Do you think that gene editing at this stage should be banned? Discuss your opinion in no less than 150 words.
