

北京林业大学 2024—2025 学年第 2 学期学位考试试卷

试卷名称: 硕士英语一外

班级_____学号_____姓名_____成绩_____

试卷说明:

- 1. 本次考试为 闭 卷考试。本试卷共计 8 页, 共 8 大部分, 请勿漏答;
- 2. 考试时间为 150 分钟, 请掌握好答题时间;
- 3. 答题之前, 请将试卷和答题纸上的考试班级、学号、姓名填写清楚;
- 4. 本试卷所有试题答案写在 答题纸 上, 否则视为无效;
- 5. 答题完毕; 请将试卷和答题纸正面向外对叠交回; 不得带出考场。

考试中心提示: 请你遵守考场纪律, 参与公平竞争!

Part I Listening (20 points, 1 point each)

Section A

Directions: In this section, you will hear nine short conversations between two speakers. At the end of each conversation a question will be asked about what was said. The conversations and the questions will be read only once. Choose the best answer from the four choices given by marking the corresponding letter with a single bar across the square brackets on your Answer Sheet.

- 1. A. To use well-known patterns.
B. To read English originals.
C. To memorize more phrases.
D. To try to use her own words.
- 2. A. He is writing a speech.
B. He is tied up at this moment.
C. He is washing his hands.
D, He is eating something.

- 3. A. His family has many members.
B. The house needs to be repaired.
C. He and his wife are living apart.
D. His family is financially strained.
- 4. A. Negative.
B. Positive.
C. Vague.
D. Wait-and-see.
- 5. A. They enjoy eating cheese.
B. They often write in chalk.
C. They are totally different.
D. They have much in common.
- 6. A. His phone is out of power.
B. His phone is out of service.
C. His phone is missing.
D. His phone was damaged.
- 7. A. She is hoping for a high score.
B. She wants the man to be silent.
C. She is begging the man for help.
D. She is attempting self-protection.
- 8. A. To take it easy and be happy.
B. To forget about the final exam.
C. To make full use of his time.
D. To take her remarks seriously.
- 9. A. At a restaurant.
B. At a school.
C. At home.
D. At a rental agency.

Section B

Directions: In this section, you will hear two mini-talks. At the end of each talk, there will be some questions. Both the talks and the questions will be read to you only once. After each question, there will be a pause. During the pause, you must choose the best answer from the four choices given by marking the corresponding letter with a single bar across the square brackets on your Answer Sheet.

Mini-talk One

10. A. About 33%.
B. Roughly 11%.
C. Almost 40%.
D. Approximately 20%.
11. A. Obesity.
B. Smoking.
C. Exposure to sunlight.
D. Alcohol consumption.
12. A. Regarding cancer as a chronic disease.
B. More physical activity at a young age.
C. More research on health behaviors.
D. Making lifestyle changes.

Mini-talk Two

13. A. To store them in a refrigerator.
B. To wrap them on the shop counter.
C. To store them at room temperature.
D. To wash them as clean as possible.
14. A. By placing them in many layers.
B. By keeping them dry and cold.

C. By covering them in paper towels.

D. By removing and discarding bad ones.

15. A. How to process strawberries.
B. How to store strawberries.
C. How to grow strawberries.
D. How to select strawberries.

Section C

Directions: In this section you will hear a short lecture. Listen to the recording and complete the notes about the lecture. You will hear the recording twice. After the recording you are asked to write down your answers on the Answer Sheet. You now have 25 seconds to read the notes below.

16. Positive experiences had remained _____ (2 words) in previous years, but dropped in 2021....
17. However, this is _____ (2 words) time for celebration, because those negative experiences are still at their highest level.
18. The report is important because it can _____ (2 words) into what helps to make lives better.
19. The biggest factors getting in the way of a happy life are _____ (3 words).
20. People need to work toward something that feels worthwhile such as raising your family, participating in your _____ (2 words) and volunteering for a worthy cause.

Part II Vocabulary (10 points, 1 point each)

Directions: Complete the following sentences by selecting the appropriate words from the given choices.

21. Bombarding plants with radiation can cause random _____ in the genetic code.
A. migrations B. immigrations C. irrigations D. mutations
22. Most Detroiters have no access to _____ food because the city has many food deserts.

- A. delicious B. nutritious C. ferocious D. momentous
23. A number of sensors are _____ around Mexico City to analyze the use of electricity in various sectors.
- A. installed B. depleted C. elapsed D. disposed
24. Untreated _____ is a classic problem for biodiversity, not just including human waste, but also chemical compounds.
- A. infrastructure B. equipment C. sewage D. device
25. Wetlands are among the most heavily _____ of all ecological systems.
- A. degraded B. utilized C. smothered D. restricted
26. The rapid urbanization brings with it implicit numerous difficulties such as the _____ of basic services and infrastructure.
- A. transformation B. sufficiency C. imbalance D. inadequacy
27. More carbon is being sequestered in wetlands than being _____ as a greenhouse gas.
- A. evaporated B. developed C. emitted D. involved
28. CRISPR-Cas9 is a scissors-like chemical tool that can _____ cut and customize stretches of genetic material, such as human DNA.
- A. randomly B. roughly C. precisely D. theoretically
29. Vertical farms use a _____ monitoring and automation system to significantly increase productivity, efficiency and consistency.
- A. basic B. sophisticated C. traditional D. outdated
30. Birds' _____ on buildings are greatly increased at nights when the lights are on.
- A. visits B. nests C. impacts D. strikes

Part III Put the selected sentences in the correct order (10 points, 2 points each)

Directions: The following passage is selected from the Abstract section of a paper entitled *Impact of Mobile Phone Use on Accidental Falls Risk in Young Adult Pedestrians*. Please fill in the blanks with the appropriate sentences listed below the passage.

Mobile phone use is known to be a distraction to pedestrians, increasing their likelihood of crossing into oncoming traffic or colliding with other people. _____ 31 _____.

This study uses a 70 cm low friction slip hazard and the threat of hazard to investigate the effects of texting while walking on gait stability, the ability to recover balance after a slip hazard and accidental falls.

_____ 32 _____. The walks were conducted over a 10-m walkway. Four progressive hazard levels were used: 1) Seated; 2) Normal Walk (walking across the walkway with no threat of a slip); 3) Threat (walking with the threat of a slip); and 4) Slip (walking with an actual 70 cm slip hazard). The three walking conditions were repeated twice with and without the mobile phone texting dual-task. Walking movement patterns and body posture were recorded using wearable sensors attached to the head, body, pelvis and feet. _____ 33 _____.

Mobile phone use significantly impaired postural balance recovery when slipping, as demonstrated by increased body sway. _____ 34 _____. Increased hazard levels also led to reduced texting accuracy.

Texting while walking can interfere with balance and body control, raising young adults' fall risk. _____ 35 _____. Pedestrians need to be discouraged from texting in hazardous areas like roadside footpaths.

- A. Study outcomes were analyzed using repeated measures analysis of variance with significance set to $P \leq .05$
- B. However, the effect of using a mobile phone to text while walking on gait stability and accidental falls in young adults remains inconclusive
- C. New educational and tech-based initiatives, like a "texting lock" that detects walking, should be implemented
- D. Mobile phone use negatively impacted gait stability as demonstrated by increased step time variability and decreased harmonic ratios
- E. Fifty healthy young adults performed six walking tasks, and one seated texting task in random order

Part IV Cloze (10 points, 1 point each)

Directions: There are 10 questions in this part of the test. Read the passage through. Then, go back and choose one suitable word or phrase marked A, B, C, or D for each blank in the passage. Mark the corresponding letter of the word or phrase you have chosen with a single bar across the square brackets on your Answer Sheet.

The earth is home to humans, but there are many mysteries ____36____ the earth. Deep inside Earth is a solid metal ball that rotates independently of our spinning planet, ____37____ a top whirling around inside a bigger top.

This inner core has ____38____ researchers since its discovery by Danish seismologist Inge Lehmann in 1936, and how it moves — the speed of rotation and the direction ____39____ it tends to spin — has been at the center of a decades-long debate. There is a growing ____40____ of evidence to suggest that the core’s spin has changed dramatically in recent years, but scientists have remained ____41____ over what exactly is happening—and what it means.

Part of the trouble is that Earth’s deep interior is ____42____ to observe or sample directly. Seismologists have accumulated information about the inner core’s motion by examining ____43____ waves from large earthquakes in this area behave. Variations between waves ____44____ similar strengths that passed through the core at different times have ____45____ scientists to measure changes in the inner core’s position and calculate its spin.

- | | | | |
|------------------|---------------|------------------|----------------|
| 36. A. spanning | B. including | C. surrounding | D. considering |
| 37. A. like | B. as | C. at | D. for |
| 38. A. exposed | B. accessed | C. governed | D. intrigued |
| 39. A. to which | B. in which | C. around where | D. in that |
| 40. A. body | B. number | C. amounts | D. host |
| 41. A. separated | B. scattered | C. distinguished | D. divided |
| 42. A. unlikely | B. impossible | C. liable | D. uneasy |
| 43. A. what | B. when | C. how | D. which |

| 44. A. in | B. of | C. during | D. on |
| 45. A. ascribed | B. contributed | C. empowered | D. rendered |

Part V Reading Comprehension (15 points, 1 point each)

Directions: In this part of the test, there are three short passages. Read each passage carefully, and then do the questions that follow. Choose the best answer from the four choices given and answer the questions on your Answer Sheet.

Passage 1

(1) The twelve new restaurants added to the New York Michelin (米其林) Guide this month, serving up cuisine ranging from “haute French” to “eco-chic”, will be toasting their success. Being featured in the handbook of the tire-maker-turned restaurant-critic is the first step towards receiving a Michelin star, the most wanted award in fine dining. Yet according to research recently published in the *Strategic Management Journal*, an improbable source of intelligence related to cooking, restaurants might be better off remaining starless.

(2) Daniel Sands of University College London’s school of management tracked the fortunes of restaurants that opened in New York in 2000-14 and received a starred review in the *New York Times*. He found that, of this promising group, establishments which went on to get a Michelin star were more likely to close down in the years that followed than those which did not. The relationship remained even when factors such as location, price and type of cuisine were taken into account. All told, 40% of restaurants awarded Michelin stars in 2005-14 had closed by the end of 2019.

(3) A Michelin star boosts publicity: the study found that Google search intensity rose by over a third for newly starred restaurants. But that fame comes at a price. First, Mr Sands argues, the restaurants’ customers change. Being in the limelight raises diners’ expectations and brings in tourists from farther away. Meeting guests’ greater demand piles on new costs. Second, the award puts a star-shaped target on the restaurants’ back. Businesses they deal with, such as ingredient suppliers and landlords, use the opportunity to charge more. Chefs, too, want their salaries to reflect the award and are more likely to be “stolen” by competitors.

(4) Food is not the only industry where such things happen. Several studies have shown that companies run by award-winning bosses underachieve relative both to their previous performance and to rivals that have received no honor. Like Michelin-starred chefs, superstar CEOs demand fatter pay packets and are more easily distracted, spending more time writing books and joining boards. In publishing, too, awards bring peril. Prizewinning books are reviewed more harshly than before their success, and worse than runners-up.

(5) For restaurants who are in it for the glory, Michelin's top award will probably remain too engaging not to pursue. But for those who simply want to stay in business, it may be safer to not quite cut the mustard.

46. It can be concluded from Paragraph One that a Michelin star _____.

- A. is often given to restaurants in New York
- B. can have a negative effect on a restaurant
- C. is awarded to twelve restaurants annually
- D. brings long-term benefits to a restaurant

47. The main idea of Paragraph Two is that star-winning restaurants _____.

- A. were assessed differently
- B. could long stay in business
- C. were likely to close down
- D. varied in price and location

48. The impacts of a Michelin star on restaurants include the following **except** _____.

- A. higher expectations by customers
- B. higher costs due to suppliers
- C. higher salaries demanded by chefs
- D. the decrease of regular customers

49. Paragraph Four is trying to argue that _____.

- A. most businesses expect awards
- B. awards are a mixed blessing
- C. writers can benefit from awards
- D. CEOs are to struggle for awards

50. Which of the following can best serve as the title of this passage?

- A. Why a Michelin Star Is Critical to Restaurants.
- B. How Restaurant Are Awarded a Michelin Star.
- C. The Curse of Top Award for Restaurants.

D. Awards Help Businesses March Forwards.

Passage Two

(1) America's federal government publishes data on the number of people injured in car crashes, each product recalled for containing peanuts and the "walkability" of every neighborhood in the country. But there is no federal record of gun crime in schools. School shootings call to mind massacres like the one in Uvalde, Texas, in 2022, when a former student killed 19 pupils and two teachers. But there is an incident of gun crime in an American school every day on average. The full, devastating impact is poorly understood.

(2) David Riedman, a data analyst from Orlando, wants to change that. He starts his day by looking through dozens of Google news alerts on school shootings. He then feeds these reports into a database which includes every time a gun is fired on school property.

(3) Gun violence in schools is increasing, but by how much is hard to say. There were at least 264 incidents in the first nine months of this year, almost three times the number in the same period in 2018, according to Riedman. Other sources vary, because each defines a school shooting differently. "People think that a school shooting is something where it's this insane person who's coming into the school," Mr Riedman says. "But really, the most common circumstance...is a dispute between students, usually taking place in a hallway or parking lot."

(4) The government's lack of insight stems in part from the Dickey Amendment, which in 1996 banned federal funds from being spent to "advocate or promote gun control". The Centers for Disease Control and Prevention could not treat gun violence as a public-health issue and conduct proper research. The restriction was scrapped in 2018, but its effects linger in America's random approaches to protecting children. Many schools have installed metal detectors and bulletproof glass, for example. But 70% of shootings happen outside, limiting the protection security measures provide.

(5) Four Democratic senators are backing a bill that would define "school shooting" for the first time in federal law and require the government to collect data on every incident. Republicans in Congress say that will not make students or parents feel safer. Mr Riedman disagrees. "We need to be adjusting policy in real time," he says. A clear understanding of gun

crime could bring home the security interventions that save lives. It may also help stimulate politicians to enact the one thing that most experts agree is guaranteed to make schools safer: more rigorous gun control.

51. In Paragraph One, America's federal government is _____.

- A. questioned about daily gun crime in schools
- B. criticized for not recording each school shooting
- C. praised for protecting public health and safety
- D. urged to reduce gun crime via stricter laws

52. Paragraph Three focuses on _____.

- A. the total number of school shootings each year
- B. reasons for increases in gun shootings in schools
- C. why the exact data on school shootings is lacking
- D. the identity of most of the gun shooters in schools

53. One reason for the variation in the number of school shootings is that _____.

- A. school shootings are defined in different ways
- B. gun violence is widespread across many states
- C. not all student disputes involve real weapons
- D. shooters are often mentally unstable individuals

54 According to Paragraph Four, _____.

- A. security upgrades have greatly reduced shootings
- B. CDC still cannot do any research on gun violence
- C. the Dickey Amendment encouraged gun control
- D. security measures can't offer enough protection

55. The central idea of this passage is that in the United States _____.

- A. there is no effective solution to gun violence
- B. the government is not doing their homework
- C. there is gun violence in schools each day

D. more rigorous gun control will be enforced

Passage Three

(1) Google is practically inescapable whenever we search for almost everything online so that "Google" is synonymous with search.

(2) That search dominance is now being targeted by the US Department of Justice(DOJ), which filed an antitrust lawsuit against Google. It's unclear what consequences the tech giant may face, but US Deputy Attorney General Jeffrey Rosen said that "nothing is off the table." Google's status as an automatically-selected search engine is one of the central aspects of the DOJ's complaint, which alleges that Google spends billions on agreements with web browsers, wireless carriers and smartphone makers to ensure that its search stays on top.

(3) Google says its practice of paying to be the default browser is "no different" than other businesses' moves to promote their products, comparing it to a cereal brand paying supermarkets to place its boxes on certain shelves.

(4) European regulators have been trying to control Google by imposing antitrust fines totaling more than \$9 billion and forcing it to allow Android users to pick their preferred browser and search engine. That doesn't appear to have worked — Google still had a roughly 93% share of Europe's search market as of September 2020.

(5) The biggest problem is that people are so conditioned to use Google that most users wouldn't bother picking anything else even when given a choice. Given the position that Google enjoys now, a lot of users might just continue to behave the same way. Getting rid of the default contracts alone is not enough.

(6) Undoing the dominance of one of the world's biggest companies — with a market value of more than \$1 trillion, virtually unlimited resources and a two-decade head start in consolidating its position — would not be easy, for Google is too powerful. Fines don't affect it. The EU regulations have basically proven they can't be regulated with behavioral remedies. Google's sheer size and power have rendered the EU's tactics relatively toothless.

(7) A second reason Google is unlikely to give up its command over online search is the lack of a feasible alternative and the challenge of building one.

(8) Google's search index contains hundreds of billions of web pages and is well over 100,000,000 gigabytes (十亿字节) in size. Developing a general search index of this scale, as well as viable search algorithms (算法), would require an investment of billions of dollars.

(9) The last company to come close was Microsoft, which had the resources to comfortably compete with Google. But Microsoft's search engine Bing, launched more than a decade ago, has failed to attract a significant audience. Bing is currently in second place behind Google, but with only roughly 3% of the global search engine market.

56. The first paragraph highlights Google's _____.

- A. dominance in online search
- B. falling popularity online
- C. contributions to technology
- D. future technological roles

57. DOJ's lawsuit against Google is primarily concerned with _____.

- A. illegal collection of users' information
- B. paying money to keep its search on top
- C. its unique role as a search engine
- D. its intense competition against rivals

58. Google remains unrivalled because of the following **except** _____.

- A. the government's support
- B. users' preference for Google
- C. the lack of competitors
- D. a huge investment that is needed

59. The last four paragraphs aim to explain _____.

- A. how to defeat Google in business
- B. why no one can rival Google
- C. ways to find a proper alternative
- D. the failure of Microsoft's Bing

60. Which of the following can best serve as the title of this passage?

- A. Where Is Google's Business Growing?
- B. What's behind the DOJ's Lawsuit?
- C. Will People Ever Stop Googling Things?
- D. Is Google Losing Its Grip Online?

Part VI Multiple choice (15 points, 1.5 points each)

Directions: Choose one suitable answer marked A, B, C, or D for each blank.

61. The discovery of penicillin _____ a revolution in the treatment of bacterial infections.

- A. triggered
- B. triggered by
- C. was triggered
- D. triggering

62. Which sentence would be most appropriate as a concluding sentence for a research paper on climate change?

- A. Climate change is a complex issue.
- B. Ultimately, mitigating climate change necessitates immediate, united global efforts.
- C. Many factors contribute to climate change.
- D. Climate change has various impacts on the environment.

63. Which sentence is the best example of a clear research objective?

- A. This study explores various factors affecting climate change.
- B. This study aims to analyze Amazon deforestation's impact on local biodiversity.
- C. Many studies have discussed climate change in recent years.
- D. Deforestation is a serious environmental issue driving climate change.

64. Which sentence is the most formal and academic?

- A. We did some tests and got interesting results.
- B. It's pretty clear that the hypothesis was correct.
- C. A lot of people think this theory is wrong.
- D. The experiments yielded statistically significant outcomes.

65. Which term is defined inappropriately?

- A. Hypothesis refers to a testable prediction about relationships between variables.

- B. Bibliography refers to a list of sources referenced in academic work.
- C. Syntax refers to the study of syntactic structures.
- D. Thesis refers to the central argument defended in a research paper.

66. Proper citation in academic writing is essential _____.

- A. to make the paper longer
- B. to avoid plagiarism and give credit to the original authors
- C. to show off the writer's knowledge
- D. to confuse the readers

67. Which item demonstrates a logical flow of ideas?

- A. The experiment was conducted. The results were unexpected. Further research is needed.
- B. Further research is needed, as the experiment was conducted and the results were unexpected.
- C. The experiment was conducted, and the unexpected results indicate that further research is needed.
- D. Unexpected results were obtained. The experiment was conducted. Further research is needed.

68. Which expression is most appropriate for the “Discussion” section of a research paper?

- A. Further experiments are needed to confirm these findings.
- B. We randomly selected 50 participants for the survey.
- C. The data collection process lasted three months.
- D. All statistical analyses were performed using SPSS.

69. _____ the advances in medical technology, diseases such as cancer and heart disease remain major health concerns.

- A. In spite of
- B. Due to
- C. Because of
- D. Owing to

70. What is the most suitable tense for describing widely accepted facts in a “Literature Review” section?

- A. Present perfect (e.g., “Researchers have found...”)

- B. Past simple (e.g., “Smith (2020) discovered...”)

- C. Future tense (e.g., “Further studies will examine...”)

- D. Present simple (e.g., “Climate change affects ecosystems...”)

Part VII Translation (10 points, 2 points each)

Directions: Put the following five sentences into Chinese. Write your Chinese version in the proper space on the Answer Sheet.

- 71. However, many countries do permit the cultivation of crops created by gene editing, with varying degrees of regulation.
- 72. The development of full AI, could spell the end of the human race, such as the ultimate use of powerful autonomous weapons.
- 73. Herbicide applications are the most common and should be performed in a manner that has the least environmental impact to native species.
- 74. The organisms that are not wiped out because of our expanding cities are starting to adapt to the urban environment by changing their behavior and reproductive patterns.
- 75. Urban parks — whether historic or newly designed — are one of the most sustainable ways of combating this island of heat and pollution.

Part VIII Writing (10 points)

Directions: The world's largest forestry and grassland germplasm (种质) preservation bank is now under construction at BFU's Xiong'an Campus, showcasing a major effort to safeguard genetic diversity. **Discuss the critical importance of biodiversity and the urgent need for its protection.** In your essay of no less than 150 words, please address the following points:

- 1. Why is biodiversity essential for both nature and humans?
- 2. What are the main causes and consequences of biodiversity loss globally?
- 3. How do initiatives like the Xiong'an germplasm bank contribute to biodiversity conservation? Why are such actions vital now?
