

北京林业大学 2025—2026 学年第 1 学期学位考试试卷

试卷名称: 硕士英语一外

班级_____学号_____姓名_____成绩_____

试卷说明:

- 1. 本次考试为 闭 卷考试。本试卷共计 8 页, 共 8 大部分, 请勿漏答;
- 2. 考试时间为 150 分钟, 请掌握好答题时间;
- 3. 答题之前, 请将试卷和答题纸上的考试班级、学号、姓名填写清楚;
- 4. 本试卷所有试题答案写在 答题卡 上, 否则视为无效;
- 5. 答题完毕; 请将试卷和答题纸交回; 不得带出考场。答题卡禁止折叠!

考试中心提示: 请你遵守考场纪律, 参与公平竞争!

Part I Listening Comprehension (20 points, 1 point each)

Section A

Directions: In this section, you will hear nine short conversations between two speakers. At the end of each conversation a question will be asked about what was said. The conversations and the questions will be read only once. Choose the best answer from the four choices given by marking the corresponding letter with a single bar across the square brackets on your Answer Sheet.

- 1. A. He stays fit by hiking.
B. He will get somewhere.
C. He can go to extremes.
D. He is prone to mistakes.
- 2. A. The best one.
B. The worst one.
C. The most expensive.
D. Hardly accessible.
- 3. A. Too disappointing.

- B. Unusually scary.
- C. Worth seeing.
- D. Thought-provoking.
- 4. A. Inside a store.
B. At the airport.
C. At a restaurant.
D. Near a hotel.
- 5. A. A big regret.
B. Enjoyable.
C. Exhausting.
D. A waste of money.
- 6. A. To get some beverage.
B. To pick up the laundry.
C. To order some takeout.
D. To buy something to eat.
- 7. A. Research costs a lot of money.
B. Researchers should be open-minded.
C. Teamwork is critical to research.
D. Research requires self-reliance.
- 8. A. He is going to help the woman.
B. He is also desperate for a job.
C. He is the only person to turn to.
D. He can't give the woman any help.
- 9. A. Disgraceful.
B. Disappointing.
C. Incredible.
D. Unacceptable.

Section B

Directions: In this section, you will hear two mini-talks. At the end of each talk, there will be

some questions. Both the talks and the questions will be read to you only once. After each question, there will be a pause. During the pause, you must choose the best answer from the four choices given by marking the corresponding letter with a single bar across the square brackets on your Answer Sheet.

Mini-talk One

10. A. A public servant.
B. A police officer.
C. An embassy employee.
D. A military serviceman.
11. A. Nearly 15,000.
B. Less than 20,000.
C. Over 50,000.
D. About 85,000.
12. A. Federal job openings.
B. Important announcements.
C. Rankings of public servants.
D. Opportunities to work in Korea.

Mini-talk Two

13. A. Walking through a big forest.
B. Taking a shower in a forest.
C. A morning trip to a real forest.
D. Immersing yourself in nature.
14. A. Volunteering.
B. Being with friends.
C. Yoga and meditation.
D. Chronic substance use.
15. A. Popular forms of exercise in daily life.
B. Ways to reduce anxiety during holidays.
C. Potential causes of stress and anxiety.

- D. Different customs related to holidays.

Section C

Directions: In this section you will hear a short lecture. Listen to the recording and complete the notes about the lecture. You will hear the recording twice. After the recording you are asked to write down your answers on the Answer Sheet. You now have 25 seconds to read the notes below.

16. In the United States, 72% of high school teachers said cell phone distraction _____ (2 words) a major problem in the classroom.
17. This ban goes beyond the school district's existing policy, which bans students from using cell phones during _____ (2 words) and limits social media use at school to educational purposes.
18. Research suggests that _____ (2 words) of cell phones impacts adolescents' well-being and is associated with...and suicidal thoughts.
19. By contrast, limiting cell phone use and social media access during the school day increases _____ (2 words) and has positive effects on mental health.
20. For example, how students would be able to communicate with parents _____ (3 words) an emergency, such as a mass shooting.

Part II Vocabulary (10 points, 1 point each)

Directions: Complete the following sentences by selecting the appropriate words from the given choices.

21. In biology, _____ are segments of DNA located on chromosomes that produce protein.
A. genes B. organisms C. molecules D. viruses
22. Genetic diversity can reinforce the biodiversity's weave because it helps individual species to _____ to fluctuations caused by climate change, disease or habitat destruction.
A. adopt B. survive C. adapt D. unravel
23. The bacteria _____ snippets of DNA from invading viruses and use them to create DNA segments known as CRISP arrays.
A. capture B. delete C. disable D. eliminate
24. Training will commence on September 1, running from Monday to Saturday _____, six

days in total.

- A. exclusive B. inclusive C. resilient D. comprehensive

25. Another unique aspect about these farms is that they use a _____ nutrient formula that is circulated and recycled throughout the facility.
A. cautious B. concise C. precise D. fertilized
26. Periodic _____ is needed to replace plants that don't grow or invasive species that move in while the native plants are taking root.
A. discharge B. maintenance C. migration D. installation
27. Urban agriculture combines the traditional mode of production with modern science and technology, and _____ the process of agricultural modernization.
A. surges B. alleviates C. aggregates D. accelerates
28. This rapid urbanization brings with it _____ numerous difficulties, all of which increase the vulnerability of cities to natural disasters.
A. supportive B. implicit C. resilient D. digital
29. Only when life is at its most varied, vigorous, and biodiverse can we hope to _____.
A. endanger B. rise C. thrive D. restore
30. The functions of wetlands are more than controlling flood, filtering pollution and _____ wild life.
A. sheltering B. improving C. rebuilding D. impacting

Part III Passage Completion (10 points, 2 points each)

Directions: The following passage is adapted from the Discussion section of a paper entitled *Personality and Environmental Concern*. Please fill in the blanks with the appropriate sentences listed below the passage.

_____.31_____. The current study provides additional support for the importance of these two personality traits in predicting environmental attitudes, while further demonstrating that their importance does not appear to be moderated by gender.

Both Agreeableness and Openness have been related to the higher order personal value of self-transcendence, reflecting an expanded sense of self and a greater concern for others.

_____.32_____. Individuals who are lower in Agreeableness tend to be more selfish, generally speaking, and are less concerned about the welfare of others. Openness, meanwhile, is associated with increased cognitive ability and flexibility in thought, potentially affording a broader perspective on humanity's place in the larger ecology and a greater aesthetic appreciation of natural beauty. Less open individuals, in contrast, are likely to have a narrower and more conservative perspective on nature's value.

_____.33_____. First, the large sample provided by the longitudinal GSOEP study allowed for a more detailed structural analysis of the relevant variables. Second, the sample was more representative of the larger population in terms of age and gender distribution. Third, the inclusion of multiple time-lagged measures allowed for an examination of the personality predictors of environmental concern across long periods of time.

Despite this study's strengths, it has notable limitations tied to GSOEP measures. While the 15-item BFI-S effectively assesses broad Big Five traits, it cannot evaluate lower-order ones — hence we could not test if specific Big Five aspects connect more strongly to environmental concern. _____.34_____, leaving trait-environment link differences unexamined. Future research could explore these with detailed measures. _____.35_____, and thereby provides a useful framework for more targeted investigations into the processes underlying these relationships.

- A. Agreeableness, for instance, is related to higher levels of empathy, which is thought to support pro-environmental motives

B. Similarly, environmental concern measures (derived from existing items) lack full coverage of environmental attitudes

C. As in previous research, greater environmental concern was related to higher levels of the Big Five personality traits of Agreeableness and Openness

D. Nonetheless, the current study provides support for the importance of personality traits in relation to environmental attitudes

E. The current analysis has a number of strengths over previous inquiries into the relationship between personality and environmental concern

Part IV Cloze (10 points, 1 point each)

Directions: There are 10 questions in this part of the test. Read the passage through. Then, go back and choose one suitable word or phrase marked A, B, C, or D for each blank in the passage. Mark the corresponding letter of the word or phrase you have chosen with a single bar across the square brackets on your Answer Sheet.

Big US cities have attractions. However, this summer, we're looking at smaller cities that aren't already ____36____ everyone's travel list—places where you'll often find small-town atmospheres and ____37____ distinctive characteristics as well as plenty to see and do for a few days or more.

At CNN Travel, we ____38____ our network of contributors for nominations for our first list of America's Best Towns to Visit. We evaluated their favorites and ____39____ the finalists to 10 by looking at each town's attractions, food and beverage offerings, nightlife and cultural scene, sense of ____40____ and proximity to other interesting spots. We also looked at travel essentials, including lodging options and the ease ____41____ tourists get there and around.

Our choices ____42____ in size from about 50,000 residents to about 225,000. They're spread ____43____ the country and serve as a reminder of why we take pride in the United States: communities ____44____ making their towns better. You'll see that spirit in neighborhoods and residents who have put all their passion, creativity and energy into endeavors that ____45____ souls and bellies.

- | | | | |

Part V Reading Comprehension (15 points, 1 point each)

Directions: In this part of the test, there are three short passages. Read each passage carefully, and then do the questions that follow. Choose the best answer from the four choices given and answer the questions on your Answer Sheet.

Passage 1

(1) Sometimes small things make a big difference. Andy Hall, a youth worker from Shropshire, a rural county in England, describes a boy who had been struggling at school. No one had thought to check if his eyes had been tested until he visited a local youth club. A new pair of glasses meant he could see the board: "simple as that". Mr Hall reckons they changed the boy's life.

(2) Youth work, which tends to happen in shabby sports halls and community centers, is not exciting. But it can have a big impact, particularly on children who might otherwise be overlooked. It has been part of the fabric of Britain's safety-net since the 19th century. But in the past 14 years more than 1,200 youth clubs have closed, leaving a threadbare service.

(3) UK Youth, a charity, reckons that millions of young people in Britain still attend youth clubs. Before 2010, local councils provided most of the money. But they have since had their funding slashed, which is devastating in that clubs have been forced to focus on mandated services like social care. As a result, funding for youth services from local councils fell from £409m in 2021 in real terms.

(4) Rural counties like Shropshire have been particularly hard-hit. The council now has only two youth centers, down from 12 in 2010, and otherwise relies on voluntary groups. It no longer runs clubs that are open to all. Instead, it targets the most vulnerable children. Mr Hall thinks that approach is not working; it makes it hard to build the kind of trusting relationships that lead to good results.

(5) One possible reason youth clubs were in the firing line is that it has been hard to prove

their benefits. The work can appear informal, even vague. But evidence of their benefits is growing. One study by a team at University College London found that 46% of those attending youth clubs had higher-education qualifications by the age of 25, compared with 38% for a matched group. Another found that those who went were more likely to be in paid employment later in life. It may be that clubs reach children that other services can't.

(6) The new Labor government does, at least, seem interested. It has pledged £300m for a network of 90 youth hubs for those most at risk, with a focus on mental health; it promises to tilt money towards prevention and follow evidence of "what works". Youth work will remain patchy. But it will not disappear.

46. The first two paragraphs are intended to _____.
A. introduce the routine work at youth clubs
B. criticize a school for lack of care for children
C. argue for the important role of youth clubs
D. tell us that youth work can be quite boring
47. The chief reason youth clubs are decreasing is _____.
A. the lack of funding
B. too large a membership
C. the absence of social care
D. no related legislation
48. The main idea of Paragraph Five is that youth clubs _____.
A. will attract much more attention
B. have a number of limitations
C. have not been adequately studied
D. have proved to be beneficial
49. The last paragraph suggests that youth clubs _____.
A. are here to stay
B. are probably doomed
C. will remain controversial

D. are concentrated in big cities

50. Which of the following can best serve as the title of this passage?

- A. Ways to Keep Youth Clubs Alive
B. Constant Evolution of Youth Clubs
C. Youth Clubs Decrease despite Benefits
D. We Don't Need Youth Clubs Anymore

Passage Two

(1) Buying a Leica camera feels like buying a piece of art. Made in Germany, the cameras are sold in wealthy and showy neighborhoods, sometimes in shops which double as galleries. The current models pack the latest imaging technology into elegant all-metal bodies. For decades they have been the chosen cameras of masters of photography such as Henri Cartier-Bresson and Annie Leibovitz. Their price is extravagant. Leica's latest compact model, the Q3, costs around \$6,000. Opt for a flagship M-series camera with a couple of lenses and the bill can easily run into five figures.

(2) What about a dedicated camera? High-end pictures can be snapped, edited and uploaded onto social media all with your smartphone. When in 2011 an interviewer asked Ms Leibovitz to recommend a camera, she responded by taking out her iPhone 4s, calling it "the snapshot camera of today". The camera on Apple's flagship device has improved with each new version, including the one released this week. Since Ms Leibovitz's remarks, the share of photos taken on smartphones has grown from 25% to over 90%. Digital camera sales, meanwhile, have plummeted by 93%. Entry-level models are steadily disappearing from the market.

(3) Premium or superior-quality cameras, however, are bucking the trend. Waiting lists for Leica's Q3, released in 2023, were initially six months long. Its success contributed to record sales at the 110-year-old firm last year. The latest version of the premium x100 camera made by Fujifilm has been sold out since its launch in February. The cameras are being sold online for multiples of their original price of \$1,600. Rivals such as Nikon have also begun to prioritize higher-end models. As a result, the average price of a camera has tripled in the past six years, according to the Camera and Imaging Products Association.

(4) Professional photographers still rely on high-end cameras: few couples would be happy to

see their wedding snaps being taken on an iPhone. Entry-level cameras were never a substitute for premium ones, and nor are smartphones.

(5) Instead, smartphones have stimulated demand for high-end cameras, by giving more people a taste for amateur photography. It helps that premium cameras have become a status symbol among the followers of the newest styles. Videos featuring Fujifilm's x100 have gained millions of views on TikTok, a trendy short-video app.

(6) Growing interest in these high-end devices helps explain why the overall number of cameras sold this year is on track to increase for the first time since 2017. For the world's embattled camera-makers, it pays to refocus.

51. It can be concluded from Paragraph One that a Leica camera _____.

- A. is probably not worth the price
- B. is usually regarded as a luxury
- C. does not look delicate enough
- D. has never been a high-end gadget

52. The central idea of Paragraph Two is that _____.

- A. no one uses digital cameras anymore
- B. smartphones can be used to take snapshots
- C. photos can be shared quickly on smartphones
- D. few see the need for a dedicated camera

53. High-end cameras are gaining popularity because of the following **except** _____.

- A. amateur photography
- B. being entry-level cameras
- C. being a symbol of status
- D. professional photographers

54. The last sentence of this passage means that _____.

- A. there is little competition between camera-makers
- B. improvement or innovation of cameras is costly
- C. camera-makers need to shift to another industry

D. trying to make cameras high-end is worthwhile

55. The central idea of this passage is that _____.

- A. demand for high-end cameras is soaring
- B. smartphones are set to replace cameras
- C. there are varied brands of cameras available
- D. smartphones make photography more popular

Passage Three

(1) A study has revealed that half girls feel suppressed by gender stereotyping, with children as young as seven believing they are valued more for their appearance than for their achievements or character. It is no coincidence that another study has shown a quarter of girls exhibit symptoms of depression by age 14.

(2) Neurobiologists now know there is little difference between male and female brains at birth. By the time humans reach adolescence, there will usually be significant divergence. Traditionally, psychologists have tended to assume this is because men and women are naturally and inherently different. It is generally believed that girls instinctively prefer dollies, pink things, sparkles and baking, eschewing “masculine” activities such as sport and science.

(3) What this assumption fails to take into account is “neuroplasticity”, combined with gender bias. Brain development is determined by what we do, and therefore if adults steer children towards certain activities based on their gender, they influence how their minds grow on a physiological level. Thus gender bias becomes a self-fulfilling prophecy.

(4) Furthermore, constraining stereotypes have a negative impact on girls' mental health, convincing them first that an ever more demanding model of physical “perfection” must be met and then that being “popular” is essential. This, combined with the increasing academic pressure, understandably causes high levels of anxiety and feelings of depression.

(5) Never is this more pronounced than in the cultural difference between co-education and single-gender schools. In a single-gender environment, girls tend to be more confident, more willing to share their opinions and more likely to develop a passion for STEM subjects. There can be no such thing as “girl” and “boy” subjects. It gives us a glimpse into what society might be like if we leveled the playing field.

(6) Parents and teachers are to spend a week engaging in a “compliments swap” challenge. This involves replacing praise focused on appearance with praise relating to character. For example, instead of commenting on a person’s shoes or hair, the emphasis is moved to remarking on sharp observations, acts of bravery or kindness. Even the most enlightened people are usually surprised when they begin noticing how often they unconsciously reinforce the notion that a woman’s worth is nothing more than the sum of her parts.

(7) Education policymakers need to know that, rather than spending every waking moment engaged in parrot-style, exam-centered, fact-based leaning, children need the time and space to develop critical thinking skills. Teachers can give young people the tools they need to question aggressive self-esteem- and mental-health-destroying cultural narratives if there is sufficient space to encourage discussion and debate at school.

56. The first three paragraphs suggest that author believes in _____.
A. the importance of appearance for girls
B. the inherent difference between genders
C. the positive effect of gender stereotyping
D. the role of neuroplasticity in a child’s growth
57. The underlined words in Paragraph Three imply that gender bias _____.
A. is eliminated because of too strong opposition
B. becomes true as a result of having been predicted
C. plays an important role in achieving success
D. helps one grow in the intended direction
58. It can be concluded from Paragraph Five that _____.
A. single-gender schools benefit girls more
B. society should be dominated by females
C. girls should be taught by female teachers
D. co-education is more beneficial for girls
59. Parents and teachers are advised to _____.
A. praise a girl for her appearance

- B. comment on a girl’s inner qualities
C. give girls more compliments
D. challenge girls via sharp comments

60. The central idea of this passage is that _____.
A. girls actually outwit boys in many ways
B. men and women are born equally clever
C. appearance is crucial to girls’ success
D. gender stereotypes leave girls depressed

Part VI Multiple choice (15 points, 1.5 points each)

Directions: Choose one suitable answer marked A, B, C, or D for each blank.

61. Which of the following is generally NOT included in the Abstract section of a research paper?
A. A brief summary of the research methods.
B. The main results or findings.
C. Detailed discussion of limitations.
D. The overall conclusion of the study.
62. The primary purpose of the “Materials and Methods” section in a research paper is to _____.
A. provide a detailed discussion of the results and their implications
B. describe the research procedure in sufficient detail for the study to be replicated
C. introduce the research question and review the existing literature
D. present the data in a visual format, such as graphs and tables
63. Which sentence best integrates a citation to support a claim?
A. Smith (2020) says that renewable energy is becoming more affordable.
B. Renewable energy is becoming more affordable (Smith, 2020).
C. A lot of people think renewable energy is cheap now (Smith).
D. It’s obvious that renewable energy is the future (Smith, 2020).
64. In academic writing, which phrase is most appropriate for introducing a counterargument?
A. “Obviously, this is wrong because...”

- B. “This idea makes no sense.”
C. “Nobody believes that...”
D. “It might be argued that...”
65. Why is it important to avoid emotional language in academic writing?
A. To make the text more entertaining.
B. To shorten the length of the paper.
C. To maintain objectivity and credibility.
D. To hide the author’s personal opinion.
66. Which of the following is most appropriate for the *Results* section of a research paper?
A. The data kind of shows a significant correlation between the variables.
B. It seems like the results are pretty important for future research.
C. We think there might be a link between the two factors we studied.
D. The analysis revealed a strong positive correlation ($r = .85$, $p < .01$) between X and Y.
67. The study identified a significant relationship between urban green spaces and mental well being, _____ emphasizing the importance of incorporating nature into urban planning.
A. thus B. therefore C. however D. besides
68. Which of the following is INCORRECT about developing academic writing style?
A. “We” is better than “I”.
B. Never use contractions.
C. Place the adverbs in the mid-position.
D. Address the reader directly.
69. Which of the following is correct about an academic paper’s Introduction?
A. It must conclude with detailed data analysis to prove the research value.
B. B. It should present specific research methods first, as they ensure validity.
C. It has a funnel-shaped structure, moving from broad context to specific research.
D. It should avoid mentioning existing literature to maintain originality.
70. Which of the following is NOT a strategy for lessening negative impact of limitations?
A. To indicate that the limitation is due to the current theories or methods.
B. To frequently repeat the word “limitation” in an attempt to emphasize honesty.

- C. To discuss possible remedies or recommendation for future research.
D. To explain the limitation clearly, that is, in what way the limitation is.

Part VII Translation (10 points, 2 points each)

Directions: Put the following five sentences into Chinese. Write your Chinese version in the proper space on the Answer Sheet.

71. Wetlands clean up water and minimize flooding downstream and there are the best habitats on the planet.
72. Being an important component in the biodiversity weave, we humans should avoid doing anything that may cut links within the weave.
73. The compounds and substances within foodstuffs that are responsible for allergic reactions can potentially be eliminated through gene editing.
74. In order to maximize production for a given space, indoor vertical farms also utilize and install racking systems to grow vegetables vertically.
75. The creation and adaptation of large green areas has always been on the agenda of governments of cities of all sizes, particularly since the car was invented.

Part VIII Writing (10 points)

Directions: Building a beautiful city is a key component of the vision of building a Beautiful China in the 15th Five-Year Plan for ecological and environmental protection. Please write a composition answering the question “**What does a beautiful city look like?**” in no less than 150 words.
